MAKO M12

Interchangeable Flush Mount

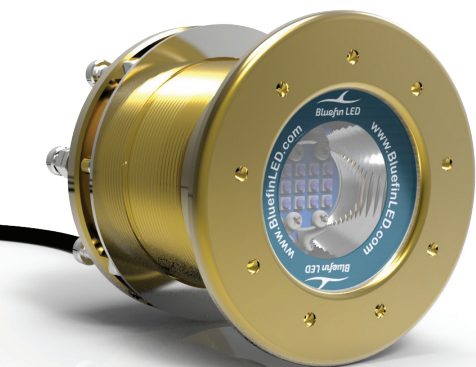

The ultra compact design of the Mako M12 Interchangeable Flush Mount offers unrivalled performance with almost unlimited mounting options thanks to the low profile bezel and short body length. Thru-Hull mounting provides secure fixing with the added benefit of a removable LED cartridge that can be serviced from inside the hull, eliminating the need of a costly haul-out fee. Very simple installation thanks to our inbuilt driver technology, just two wires to connect, reverse polarity protected with active thermal control. Guard X protective coating on the lens prevents marine growth build-up.
