

Chart Plotter System upgrade procedure - For Units with SD card

1. Download the ZIP file
2. Extract the CMPUPD.SWX file from ZIP file
3. By using any commercial SD card reader create the folder \UPLOAD\ in the root of a 128MB (or bigger) SD card
4. Copy the file CMPUPD.SWX into the folder \UPLOAD\
5. Insert the SD card into the Chart Plotter SD card slot
6. Turn the Chart Plotter on
7. The message “**LOADING COMPONENTS**” will be shown on the screen; this operation could take several minutes.
8. The update is complete when the Chart Plotter starts running
9. Turn the Chart Plotter Off
10. Extract the SD card
11. The plotter is ready to run with new software version and other components installed.
